

Port of Kaohsiung was Shortlisted for "World Port Sustainability Program (WPSP)"

Container Terminal No.7

The Great Harbor Bridge

Port of Kaohsiung participated in the WPSP hosted by the International Association of Ports and Harbors (IAPH), and was listed in the top three for resilient physical infrastructure-entity with the "2017-2021 comprehensive master-plan".

This plan is to install resilient infrastructure and implement environmentally friendly technologies on one hand, and increase the community outreach and port-city dialogue on the other. These projects' synergy creates a new way to think about the port city's development as a whole, and enhances the UN's SDGs.
